## Snap Tab Pouch Tutorial

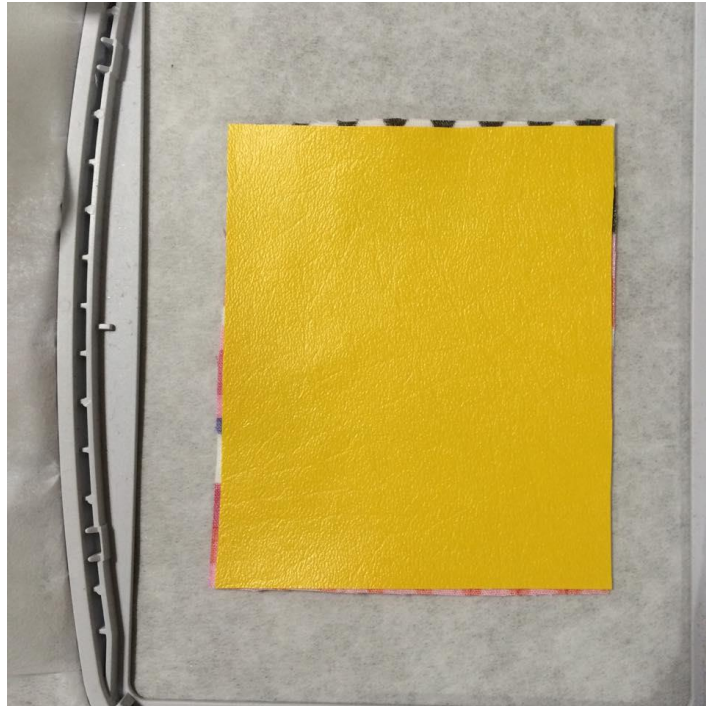

Step 1, hoop stabilizer and  
stitch step 1, placement stitch.

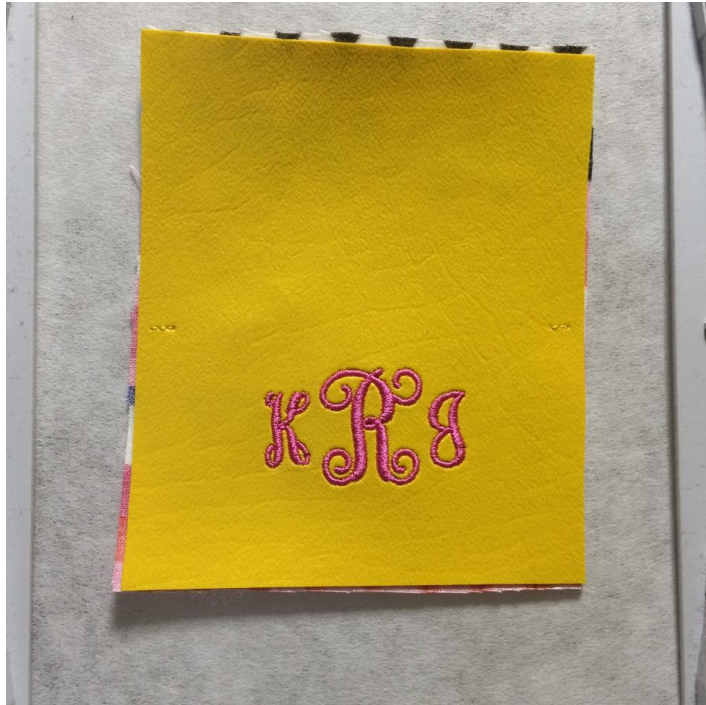

Place 2 pieces of fabric wrong  
sides together. This is marine  
vinyl and cotton.

Lay the fabric with the fabric you want on the outside, on the top, the inner fabric against the stabilizer.

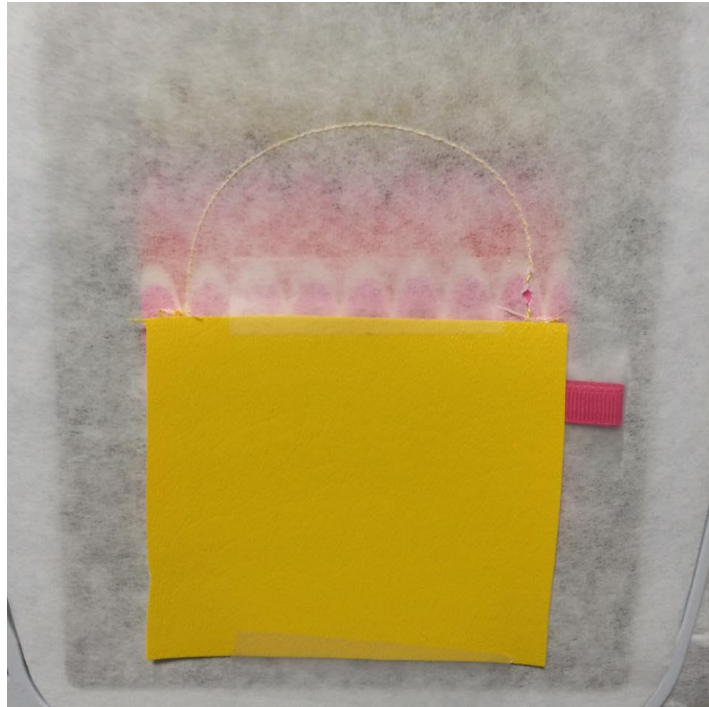

Stitch out your monogram or if you chose to add one.

Stitch step 2, placement lines  
for your back piece of fabric.

Lay a piece of folded ribbon  
below your placement lines  
where you chose, and tape in  
place.

Float a piece of fabric below  
the hoop lining the top edge up  
with the placement lines. Tape  
in place.

Stitch step 3, final tack down.

Peel away stabilizer from  
around and inside the pouch  
on the back.

Trim and add snaps and a key  
ring and you're done!
