

# In The Hoop "Non Paper Doll" Tutorial

by : Dejah Vue Designs

Step 1: Hoop Medium to Heavy weight tear away stabilizer to your embroidery hoop.

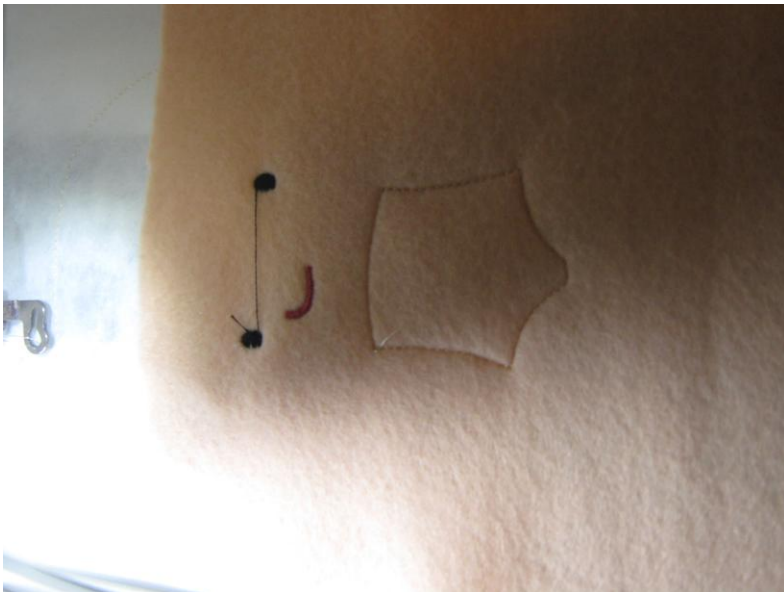

Step 2 : Run Step 1 which is a placement stitch for the entire felt doll .

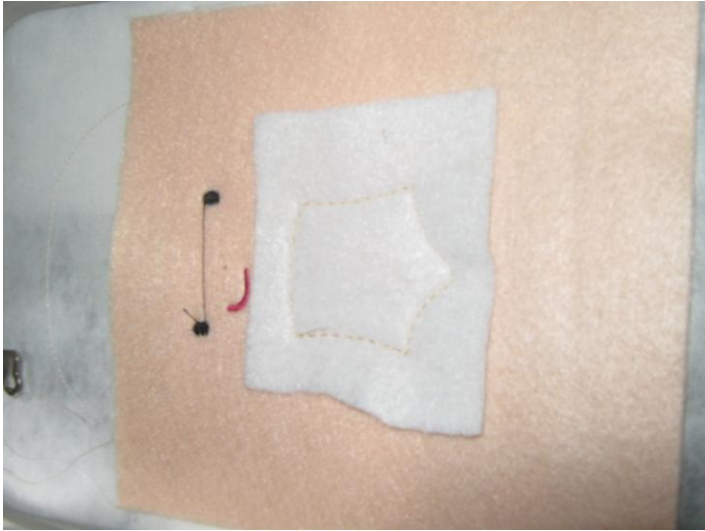

Step 3 & 4- place skin tone felt over the placement lines of the head/body... stitch steps 2 and 3 which are eyes and mouth.

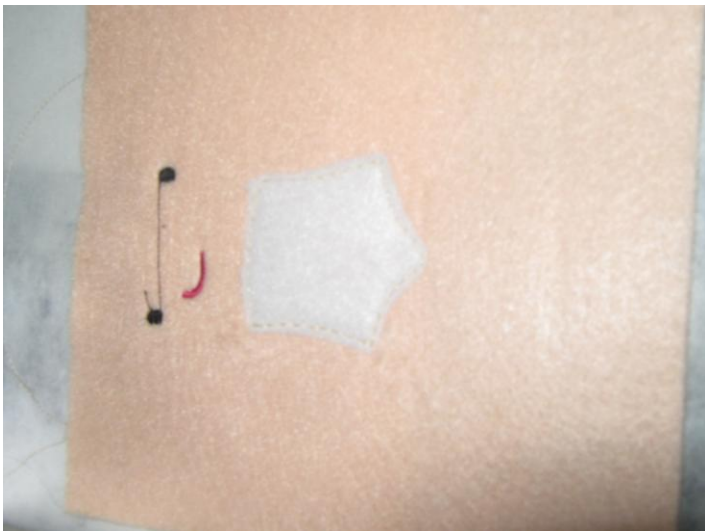

Step 5: placement Stitch for the "undergarments"

Step 6: lay white felt (or whatever color u like) over placement lines and tack down the felt

Step 7 Cut of the access white felt

Step 8: run placement line for hair, this is not a needed step but there for those of you that will use it... if you want u can skip and just add felt and tack down with step 7

Step 9: lay felt over placement lines and tack down.

Step 10: cut out around the hair not cutting the flesh tone felt.

Step 11: Attach back felt, I use white but you can use flesh tone if you prefer...it is best to use spray adhesive on this step

Step 12: run last two steps.

Step 13: Cut as close to the stitches without cutting the stitches..

Add clothes and play!
